Education

2021.09–Present

PhD Candidate in Applied Mathematics

The Hong Kong Polytechnic University, Hong Kong SAR, China.

Derivative-free optimization, especially direct-search methods.

Co-supervised by Dr. Zaikun Zhang and Prof. Xiaojun Chen

2019–2021

MSc in Financial Engineering

The Chinese University of Hong Kong, Shenzhen, Shenzhen, China

2015–2019

BSc in Mathematics and Applied Mathematics

Jilin University, Changchun, China

Selected Presentations

2024

Blockwise Direct-Search Methods (represented by Prof. Zaikun Zhang).
25th International Symposium on Mathematical Programming (ISMP), Montréal, Canada.

2024

Blockwise Direct-Search Methods. 2nd Derivative-Free Optimization Symposium (DFOS), Padova, Italy.

Software

BDS – A package for solving unconstrained optimization problems without using derivatives.

- **MATLAB version:** github.com/blockwise-direct-search/bds
- **Python version:** github.com/blockwise-direct-search/bds_python

Honors & Awards

To be added.

Skills

Languages: Mandarin (native), English (professional)

Programming: Python, MATLAB, Git, Linux
